PREFACE

This is the tenth issue of *Agricultural Prices in India*. It describes the position of agricultural prices in 1960 and includes statistical tables on farm (harvest), wholesale and retail prices of various agricultural commodities. The data, drawn from a variety of sources, such as State bulletins, journals and gazettes, publications of other Ministries and FAO literature, may not have the same measure of accuracy. Any views expressed in the Introduction should not be taken as necessarily those of the Government of India.

The detailed work involved in the compilation of this publication was done in the Agricultural Wages, Prices and Tariffs Branch of this Directorate.

NEW DELHI,

January 1964

S. C. CHAUDHRI,

*Economic and Statistical Adviser
to the Government of India,
Ministry of Food and Agriculture.*

B.—Index Numbers of Wholesale Prices in Calcutta by Groups of Articles	236
Appendix II—Exchange Rates between Indian Rupee and Principal Foreign Currencies	238
Appendix III—Tariff Values for 1960-61 and 1961-62 fixed under the Agricultural Produce Cess Act, 1940	241
Appendix IV—Conversion Table of Old Coinage into Naye Paise	244

INTRODUCTION

During the year 1960, wholesale prices in India recorded a sharp advance, mainly due to shortfall in the 1959-60 output of raw materials and manufactures and the pressure of continued expansion in money supply and bank credit. The money supply expanded by about Rs. 940 crores or nearly 48 per cent during the First and Second Five Year Plan periods. The rise in prices was particularly marked in the groups of industrial raw materials and manufactures. Prices in the food articles group showed little change. The slight hardening in the prices of food articles during the year was due to the small decline of 0.46 million tons in the production of foodgrains during 1959-60 as compared with the record output in the previous year. In the industrial raw materials group, prices of all major commercial crops of oilseeds, cotton, jute and mesta increased considerably as a result of the marked decline in the production of these commodities in 1959-60 as compared to 1958-59. Except a slight fall during March 1960, the index for wholesale prices of all commodities started rising from the beginning of January 1960 itself and reached the peak level in October 1960. Subsequently, however, small losses were noticeable, but towards the close of the year the general level of prices was still about 6 per cent higher than that at the end of the previous year. Thus, the Economic Adviser's Index Number of Wholesale Prices of all commodities which stood at 117.9 in December 1959 rose to 119.5 in February 1960. It declined to 118.9 in March 1960. Subsequently, it rose continuously and attained the peak level of 126.2 in October 1960. The index for all commodities declined in the last two months of the year, being 124.6 in December 1960. The index for food articles which stood at 118.2 in December 1959, fluctuated during the first quarter of 1960. It started increasing from April 1960 and reached 124.0 in July 1960. Thereafter, the index for food articles showed a declining tendency and stood at 117.0 in December 1960. The index for industrial raw materials advanced from 127.2 in December 1959 to 140.1 in May 1960. It fluctuated during the next four months and shot up to 146.6 in October 1960. The index for industrial raw materials stood at 149.5 in December 1960, which was about 18 per cent higher as compared to December 1959. The index for manufactures rose steadily from 113.4 in December 1959 to 126.0 in December 1960.

FOODGRAINS

The production of foodgrains during 1959-60 showed a slight decline and amounted to 75·46 million tons as against the record output of 75·92 million tons in 1958-59. The output of cereals in 1959-60 was higher at 63·85 million tons compared to 62·98 million tons in the preceding year. The production of pulses, however, declined from 12·94 million tons in 1958-59 to 11·61 million tons in 1959-60, showing a fall of about 10·3 per cent. Despite the slight shortfall in production and increased demand due to growth of population and improvement in the purchasing power of people, the foodgrains price situation remained more or less comfortable during the year 1960. Market arrivals of the two important cereals, rice and wheat, showed an increase in many States due partly to the suspension of procurement levy. As a result, prices of cereals tended to decline towards the latter half of 1960. The all-India index number of wholesale prices of cereals which had risen from 100·8 in December 1959 to 109·5 in July 1960, dropped to 100·4 in December 1960. While in 1959, the peak index of cereals prices was reached in October, in the year 1960 the peak was recorded in July. Moreover, the peak index reached in 1960 was the same as in 1959 and was about 4 per cent lower than that in 1958. Another feature of the cereals price position in 1960 was the narrowing down of the fluctuations. Thus, the difference between the minimum and the maximum price indices during 1960 was about 9 per cent as against 11 per cent during 1959 and 21 during 1958. In the case of pulses, the all-India index of prices rose from 91·8 in December 1959 to 95·1 in February 1960. Thereafter it declined and remained steady upto June 1960. It shot up in July 1960 and ruled more or less steady during the remaining months of the year, being 93·6 in December 1960. The comfortable price and supply position of foodgrains enabled the Government to build up substantial reserves and to withdraw the Guest Control Orders in most of the States. The various regulatory and anti speculative measures, which were enforced in 1959, were continued in 1960 also. Government imported 5·06 million tons of cereals during 1960 as against 3·81 million tons imported in 1959.

The trend in prices of individual foodgrains during 1960 is indicated in the following paragraphs.

Rice—Production of rice estimated at 31·18 million tons in 1959-60 was slightly higher than 30·36 million tons in 1958-59. The increase in production during 1959-60 was shared mainly by the Southern States, Orissa, Punjab and West Bengal. Part of the increase was however offset by a decline in production in the States of Bihar, Madhya Pradesh and U.P. With brighter prospects of 1959-60 rice crops, prices of rice began to decline and the all-India index of wholesale prices stood at 101·7 in January, 1960. Subsequently, the index steadily rose to 115·3 in August 1960. Thereafter, it started declining and by December 1960 again came down to 101·7. In the first three quarters of 1960, rice prices remained generally higher than those in the corresponding quarters of the previous year. But as a result of the continued decline which began in August 1960, prices in the last quarter of 1960 ruled generally lower than those in the corresponding period of the previous year. Prices in 1960 were generally higher than those during 1959 in the surplus States of Andhra Pradesh, Orissa, Madhya Pradesh and also in the deficit States of Mysore and Bihar. Contrary to this, prices were generally lower in the deficit States of West Bengal, Kerala, Maharashtra and also parts of marginally placed States of Assam, U.P. and Madras. In the case of West Bengal, the decline in prices was largely due to the linking of the State with

Orissa as a result of the formation of the Eastern Rice Zone towards the end of December, 1959. At Vijayawada (Andhra Pradesh) the price of rice rose from Rs. 19·16 per maund in January 1960 to Rs. 22·16 in September. Thereafter it declined to Rs. 18·83 in December. At Kumbakonam (Madras) the price went up from Rs. 18·00 in January to Rs. 24·00 per md. in November and declined to Rs. 20·50 in December. At Shimoga (Mysore) the price rose from Rs. 17·00 in January to Rs. 20·33 in November and then sagged to Rs. 17·33 per maund in December. At Kozhikode (Kerala) the price rose from Rs. 19·25 per maund in January to Rs. 21·75 in April. After showing an erratic trend for some time, it further rose to Rs. 24·00 in November. The price declined to Rs. 22·50 in December. In the States of Orissa, West Bengal, Madhya Pradesh and U.P. prices generally rose until about the middle of the year and thereafter exhibited a fall. At Jeypore (Orissa) the price rose from Rs. 14·31 in January to Rs. 16·00 in May and subsequently receded to Rs. 12·00 towards the end of the year. At Sainthia (West Bengal) the price declined from Rs. 24·50 in January to Rs. 23·50 in March. Thereafter it rose to Rs. 25·50 in July but fell to Rs. 20·00 in December.

Millets—The production of millets (jowar, bajra and small millets) in 1959-60 stood at 13·87 million tons being about 7 per cent lower than the production of 14·84 million tons in 1958-59. As a result, prices of millets generally recorded a rise in the first three quarters of 1960.

Jowar—The significant decline of about 5 per cent in the production of jowar influenced its prices considerably. In the first three quarters of 1960, prices were higher than those in the corresponding quarters 1959. However, the prices tended to be generally lower in the last quarter of 1960 compared with the prices in the corresponding period of 1959. The index of prices of jowar rose steadily from 119·0 in January 1960 to 129·8 in July. Thereafter, it showed a tendency to decline and fell back to 119·4 in December. Prices at individual centres also exhibited a similar trend. The price of jowar at Hyderabad (Andhra Pradesh) rose from Rs. 14·06 per md. in January to Rs. 15·56 in July. Thereafter, it gradually fell to Rs. 12·78 in November. At Ujjain (Madhya Pradesh) the price rose from Rs. 12·07 in January to Rs. 15·37 in July and then receded to Rs. 11·87 in December. At Akola (Maharashtra) the price was more or less steady at Rs. 14·00 till May. Thereafter it rose to Rs. 15·60 in September. The price fell to Rs. 13·20 in October and showed no change thereafter till the close of the year. At Gulbarga (Mysore) the price fell from Rs. 16 in January to Rs. 14·00 in March. Thereafter the price rose to Rs. 16·42 in October. It, however, stood at Rs. 16·05 in December. At Jhansi (Uttar Pradesh) the price declined from Rs. 12·08 in January to Rs. 11·13 in March. Thereafter it rose to 13·91 in June. In the subsequent months of the year, the price eased somewhat and declined to Rs. 11·22 per maund at the end of the year.

Bajra—The price of bajra in the first eight months of 1960 was lower than that in the corresponding period of 1959. For the rest of the period of the year under review, it ruled higher. The all-India index of wholesale price of bajra moved upto 128·4 in February 1960. After exhibiting a fluctuating downward trend upto June, it shot up to 131·7 in July. It further rose to 136·9 in October. Thereafter, it declined and stood at 131·1 in December, compared to 120·5 in December 1959. At individual centres also, the prices exhibited a more or less similar trend. At Anakapalli (Andhra Pradesh) the price of bajra rose from Rs. 11·50 per md. in January to Rs. 13·25 in March. Then it fell to Rs. 12·00 in May. The price ranged between Rs. 12·30 and Rs. 12·92 during June to December. At Rajkot (Gujarat) the price of bajra fluctuated considerably, being Rs. 16·42 in January 1960

Rs. 19·60 in October and Rs. 18·01 in December. At Jodhpur (Rajasthan) the price fell from Rs. 15·62 in February to Rs. 12·50 in March. Thereafter, it remained steady upto May. An upward trend was noticed in the price during June to November. It moved up to Rs. 16·95 in November but again declined to Rs. 15·12 in December. At Agra (Uttar Pradesh) the price fell from Rs. 14·25 in January to Rs. 13·75 in March but rose to Rs. 16·00 in July. Thereafter the price took a downward trend and sagged to Rs. 14·76 in December.

Maize—Production of maize was estimated at 4·01 million tons in 1959-60 as against 3·41 million tons in 1958-59 showing thereby an increase of about 17·5 per cent. Price of maize during 1960 behaved in an erratic manner. The all-India index of wholesale prices of maize after having fallen to 100·2 in April 1960 rose to 117·1 in July. During August—December, prices again displayed a downward trend, the index in December being 103·3. At individual centres also the prices behaved in an erratic manner. Thus, the price at Khagaria (Bihar) rose from Rs. 10·00 in January to Rs. 15·00 in June and then fell to Rs. 9·25 in September. Thereafter, the price remained steady at that level till the end of the year. At Ludhiana (Punjab) the price fell from Rs. 11·37 in January to Rs. 9·37 in April and then rose to Rs. 12·94 in September. After declining to Rs. 11·75 in November the price stood at Rs. 12·45 in December. At Chandausi (Uttar Pradesh) the price of maize fell from Rs. 10·87 in January to Rs. 9·75 in March and then rose to Rs. 12·50 in September. After falling to Rs. 11·25 in November the price again went up to Rs. 12·75 in December.

Ragi—The production of ragi increased from 1·92 million tons in 1958-59 to 1·96 million tons in 1959-60, showing an increase of 2·1 per cent. The all-India index of wholesale price of ragi rose gradually from 111·6 in January 1960 to 122·5 in July, thereafter witnessing a fall in August to 121·0; the index again began to rise and reached 123·5 in November. It, however, receded to 119·6 in December.

Wheat—Production of wheat recorded an increase from 9·80 million tons in 1958-59 to 10·16 million tons in 1959-60. The increase in production occurred mainly in U.P. and Madhya Pradesh. The production showed some decline in Maharashtra, Punjab and Bihar. Due to increase in production within the country and larger imports from abroad, the price position during 1960 remained easy for wheat and was characterised by absence of rise in prices during the lean period.

The all-India index for wholesale price of wheat which had risen to 97·5 in February, 1960 came down to 87·2 in May. Thereafter, prices rose to the maximum level of 91·7 in July. During the remaining months of the year, wheat prices remained steady around the level of 90 and the year closed with the index at 89·4. The price of wheat in 1960 remained lower than that during 1959 in almost all the important wheat producing States. Prices at individual centres also exhibited a more or less similar trend. The price of wheat at Hapur (Uttar Pradesh) declined from Rs. 20·00 per md. in January to Rs. 16·00 in May. Thereafter the price rose and reached Rs. 17·25 in October. Towards the end of the year, the price again fell to Rs. 17·00. At Moga (Punjab) the price fell from Rs. 17·50 in January to Rs. 14·50 in June. Thereafter the price rose to Rs. 16·10 in November. It however, fell to Rs. 15·37 in December. At Kotah (Rajasthan) the price fell from Rs. 15·10 in January to Rs. 14·50 in April. Thereafter it rose to Rs. 16·80 in July. In the subsequent months the price fluctuated within narrow limits and stood at Rs. 16·50 in December. At Sagar (Madhya Pradesh) the price declined from Rs. 13·80 in February to Rs. 13·10 in April. Thereafter it rose to Rs. 14·10 in July. In the subsequent months, the price position again became easy and in December, 1960 the price stood at Rs. 12·50. A similar price position

was in evidence in Bihar, Gujarat and Maharashtra. With the accumulation of large stocks with Government, purchases of wheat were given up in all the States by September. With effect from the 24th November, the export of wheat was also allowed from Madhya Pradesh to Maharashtra and Gujarat through licensed wholesalers. The requirements of the roller flour mills for wheat were met from Government stocks as the ban on the open market purchases of wheat by these mills was continued in most parts of the country. The quantity of wheat imported was 4.32 million tons in 1960 as against 3.50 million tons in 1959. Besides, 0.39 million tons of wheat was purchased by the State Government within the country. The quantity of wheat distributed by Government increased from 3.57 million tons in 1959 to 3.62 million tons in 1960.

Barley—The output of barley in 1959-60 was estimated at 2,674 thousand tons as against 2,651 thousand tons in 1958-59. In the first five months of 1960, prices of barley did not show wide fluctuations and the all-India index for wholesale price of barley stood steady around 98 to 99. The prices again took an upward trend from June 1960 and reached the maximum level of 109.5 in July 1960. From August, 1960 prices again witnessed a downward trend and gradually fell to 108.6 in December. Prices in the first half of 1960 were considerably lower than those in the corresponding period of 1959 but thereafter they became somewhat higher. At individual centres too, particularly in Punjab and Rajasthan, prices behaved more or less in the same manner. At Moga (Punjab) the price of barley was quoted at Rs. 11.00 per md. upto June, 1960. Thereafter it started rising and reached the level of Rs. 12.00 in November. At Jaipur (Rajasthan) the price of barley declined from Rs. 13.15 in February to Rs. 12.50 in May. Thereafter it gradually rose to Rs. 14.00 in October and stood at Rs. 13.25 at the close of the year. At Hapur (Uttar Pradesh) the price of barley remained steady at Rs. 12.00 in the first quarter of the year. With the arrivals of the new crop the price showed some decline in the second quarter. In the latter half of the year, there was an upward trend and it was quoted at Rs. 12.75 in December 1960 as against Rs. 11.50 per md. in June.

Gram—Production of gram during 1959-60 registered a considerable decline having fallen from the record output of 6.91 million tons in 1958-59 to 5.53 million tons in 1959-60. The decrease in production was shared by nearly all the principal gram producing States. As a result, the all-India index for wholesale price of gram rose steadily from 73.8 in March 1960 to 92.5 in December. In the first four months of 1960 prices of gram were considerably lower than those in the corresponding period of 1959. In the remaining part of the year under review they became somewhat higher. The same price trend was witnessed at individual centres. The price of gram rose from Rs. 12.00 in March 1960 to Rs. 16.44 in December at Moga (Punjab). At Hapur (U.P.) the price increased from Rs. 12.75 to Rs. 16.75 during the same period. In Bihar, gram prices displayed a mixed tendency. At Patna (Bihar) the price of gram moved up from Rs. 13.50 in March to Rs. 16.00 in December.

SUGAR AND GUR

During 1959-60 (November to October) season the sugar production (direct from sugarcane) increased from 19.20 lakh tons in 1958-59 to 24.43 lakh tons or by about 27.2 per cent. The phenomenal increase in production was attributed to larger sugarcane produced due to higher area under the crop and better supply of cane to sugar factories. Sugar consumption has tended to go up in recent years mainly due to growth in population, increase in *per-capita* income and changes in dietic habits of the people. Before the beginning of the First Plan, sugar consumption amounted to 9.43 lakh tons and it rose to 20.42 lakh tons in 1957-58, 20.80 lakh tons in 1958-59 and 20.21 lakh tons in 1959-60. The sugarcane

growers were assured of the guaranteed minimum price of Rs. 1.62 per maund for gate deliveries and Rs. 1.50 per maund for deliveries at rail heads during the 1959-60 season.

With a view to arranging distribution of sugar supplies at reasonable prices, the Government started assigning, since July, 1959, specific quotas to individual States and banned *inter-State* movement of sugar so as to ensure that the quotas allotted were available to the States for consumption. As from 4 April 1960, the Government fixed the *ex-factory* price of ISS/D-29 grade of sugar produced by South Bihar factories with prescribed differentials for other grades. In the beginning of the 1959-60 season sugar prices showed a hardening tendency at some centres but towards the end of the year prices eased as a result of the regulatory measures taken by the Government from time to time. Thanks to the stability in sugar prices, the margin on advances of sugar which was reduced from 45 per cent to 25 per cent in December, 1960 was altogether withdrawn on April 21, 1961. Prices of sugar declined from Rs. 44.00 per md. in December 1959 to Rs. 40.18 per maund in December 1960 at Hapur (U.P.) and from Rs. 50.00 to Rs. 44.00 at Kanpur (U.P.) during the same period. Sugar prices however, rose from Rs. 44.43 in January, 1960 to Rs. 44.80 in December at Jullundur (Punjab). At Calcutta, the price of sugar declined from Rs. 50.00 in January to Rs. 41.85 in December. At Madras, the price ranged between Rs. 42.98 in January to Rs. 43.02 in December. The Economic Adviser's index number of wholesale prices of sugar (Base: 1952-53=100) was steady during 1960 and stood at 127 in December, 1960, just where it was during the corresponding month of the previous year.

Prices of gur during 1959-60 generally witnessed a mixed behaviour at Hapur, Calcutta, and Bombay, some decline was noticed at Madras and Patna. The Economic Adviser's index number of wholesale prices of gur declined gradually from 180 in November, 1959 to 142 in October, 1960 and to 126 in December. The price of gur fell from Rs. 17.62 per md. in January, 1960 to Rs. 13.25 per md. in December 1960 at Hapur, from Rs. 18.11 to Rs. 17.54 per md. at Madras and from Rs. 18.00 to Rs. 17.00 per maund at Calcutta during the same period.

OILSEEDS AND VEGETABLE OILS

The production of the five major oilseeds (groundnut, rape and mustard, sesamum, linseed and castor seed) during 1959-60 showed a substantial decline and stood at 64.52 lakh tons as compared to 71.89 lakh tons in 1958-59. Prices of oilseeds and vegetable oils registered a significant increase (10.4 per cent in the case of oilseeds and 12.5 per cent in the case of edible oils) during 1960, over 1959 largely as a result of decline in the production of the major oilseeds. The increasing demand for oilseeds and vegetable oils was also responsible for the high level of prices. Speculation also was reported to be rampant in the markets. The all-India index number of wholesale prices of oilseeds rose more or less steadily from 130.9 in December 1959 to the high level of 150.9 in July 1960. It declined to 147.0 in the next month and 146.9 in September, 1960. Thereafter it rose steadily and touched the peak level of 153.5 in December.

A more or less similar trend was in evidence in the edible oils group. The all-India index number of wholesale prices for edible vegetable oils went up from 127.9 in December 1959 to 137.8 in February 1960 and stood near that level till May. Thereafter it took a regular upward trend and reached the peak level of 154.0 in December. The Government took a series of measures to check the upward movement of prices. The Reserve Bank of India issued a directive in December, 1959 requiring all scheduled banks to maintain stipulated margins in respect of advances against groundnut and other oilseeds with a

view to checking the contra-seasonal rise in prices. With the approval of the Forward Markets Commission, the Bombay Oilseeds and Oil Exchange Ltd., also fixed with effect from 4th February 1960, maximum price for the Groundnut May 1960 delivery contract at Rs. 225 per candy.

Groundnut and Groundnut Oil—Prices of groundnut and groundnut oil ruled at high levels during 1960 due to a heavy decline in the production of groundnut. At the end of December, 1959 groundnut and groundnut oil were quoted at Bombay at Rs. 29·20 and Rs. 60·97 per maund respectively. Prices continued to rise and by the end of January 1960 groundnut and groundnut oil were quoted at Bombay at Rs. 32·33 and Rs. 65·38 per maund respectively. A tight supply position coupled with improving prospects for exports of groundnut and its oil combined to be the bullish influence. With a view to curbing speculation, the Forward Markets Commission directed the Bombay Oilseeds and Oils Exchange Ltd., to levy a special margin of Rs. 106·25 per candy on members holding a total long position in excess of 1500 candies in respect of the February and May 1960 deliveries even during the non-delivery period whenever the price of either of these contracts ruled above Rs. 212·50 per candy. The Commission took parallel action in respect of other recognised Associations. All these measures had little effect on the upward trend in prices. With minor fluctuations prices of groundnut and groundnut oil rose steadily till the close of July, 1960 when the quotations ruled at Rs. 35·45 and Rs. 73·09 per maund respectively. Subsequently the prices started declining and at the end of November, 1960 groundnut and groundnut oil were quoted at Bombay at Rs. 31·07 and Rs. 69·24 per maund respectively. The easy trend in prices during this period was attributed mainly to arrivals of the new groundnut crop in the market and to the considerably higher production in 1960-61 than that in the previous year. This break in the upward movement of prices was, however, short-lived. The announcement of H.P.S. groundnut export quota and the new linking scheme for groundnut oil reversed the price-trend and at the end of December 1960, groundnut and groundnut oil at Bombay stood at Rs. 33·59 and Rs. 71·66 respectively. The all-India index number for wholesale price of groundnut rose from 130·6 in January 1960 to 144·1 in April and to an unprecedented level of 150·0 in July. Thereafter, the index declined in the following months and stood at 144·4 in December. A similar trend was in evidence in the case of groundnut oil index which ranged between 118·1 in January 1960 and 144·3 in October and stood at 135·0 in December.

Linseed and Linseed Oil—Prices of linseed and linseed oil moved up during the year under review due to a decline in the production of linseed from 4·51 lakh tons in 1958-59 to 4·39 lakh tons in 1959-60. The all-India indices of wholesale prices for linseed and linseed oil rose from 124·6 and 112·0 respectively in December 1959 to 130·0 and 135·3 respectively in December 1960. At the end of December 1959, linseed and linseed oil were quoted at Bombay at Rs. 24·98 and Rs. 47·02 per maund respectively. Prices declined slightly in the next four months due to dull export prospects for linseed oil as there was wide disparity between prices of Indian and foreign varieties of oil. Further weakness in the market was attributed to the apprehensions that the U.S. Commercial Credit Corporation would release a substantial quantity of linseed oil. Linseed and linseed oil prices rose steadily from Rs. 22·95 and Rs. 46·28 per maund respectively in February 1960 to Rs. 24·70 and Rs. 50·51 by the end of July. In the latter half of 1960, prices showed a generally rising trend. By the end of December, prices of linseed and its oil moved up to the high levels of Rs. 27·25 and Rs. 62·33 respectively. A tight supply position occasioned by meagre arrivals of new crop and absence of official restraints on forward trading contributed to the bullish sentiment in the market. Reports that the U. K. was showing interest in Indian linseed oil since Argentina could not ensure regular supplies also aided this sentiment.

Castorseed and Castor Oil—During the year 1960, there was substantial increase in prices of castorseed and castor oil although there was a slight rise in the production of castor seed from 110 thousand tons in 1958-59 to 113 thousand tons in 1959-60. The all-India indices of wholesale prices for castorseed and castor oil rose from 116.1 and 97.4 respectively in December 1959 to 131.5 and 108.9 respectively at the close of 1960. Prices of castorseed and castor oil were quoted at Rs. 23.51 and Rs. 53.63 per maund respectively at Bombay at the end of December 1959. Prices throughout 1960 ruled at relatively high levels. Encouraging export outlook for castor oil acted as the most important bullish factor. Brazil having little surplus of castor oil to export to the U.S. market, India had better prospects for export. Reports of a sizeable business having been put through with the communist countries further strengthened the sentiment. Prices of castorseed and oil moved up more or less steadily to Rs. 25.07 and Rs. 54.36 per maund respectively at the end of July 1960. In the subsequent months a slight fall was noticed. The main bearish factor was the release by the U.S. Department of Agriculture of the estimates of Brazil crop which dimmed export prospects. At Bombay castorseed and its oil stood at Rs. 25.19 and Rs. 52.25 per maund respectively in December 1960 as against Rs. 23.51 and Rs. 53.63 a year earlier.

Mustard Seed and Mustard Oil—The movement of prices of mustard seed and oil during the year under review followed an erratic trend. The all-India indices for wholesale prices of rapeseed and mustard oil moved up from 142.8 and 148.8 respectively in December 1959 to 178.6 and 177.4 in December 1960. At Kanpur (U.P.), prices of mustard seed and mustard oil were quoted at Rs. 32.00 and Rs. 69.00 per maund in December 1959. Mustard seed prices eased to Rs. 29.09 in May 1960 but again rose to Rs. 32.00 in July, 1960. Mustard oil prices, after an initial fall from Rs. 74.00 in January 1960 to Rs. 70.00 in March went up again to Rs. 74.00 in April. The price fell to Rs. 70.00 in May and rose again to Rs. 77.00 in July, 1960. Prices of both seed and oil declined slightly in August 1960 and firmed up again. Quotations for mustard seed and oil at Kanpur showed a steadily rising trend during the rest of the year and reached the highest levels of Rs. 36.00 and Rs. 86.00 per maund respectively in December 1960.

Sesamum Seed and Sesamum Oil—Prices of sesamum seed and oil were influenced by the general behaviour of the market for other edible oilseeds and oils, increased demand for edible oils in general being responsible for the upward trend in prices. The production of sesamum seed registered a heavy decline from 506 thousand tons in 1958-59 to 364 thousand tons in 1959-60. Sesamum seed and sesamum oil at Bombay were quoted at Rs. 33.42 and Rs. 62.44 per maund respectively in December 1959. Sesamum seed quotation ruled firm at Rs. 34.53 during January—March 1960, thereafter it showed an erratic trend. Sesamum oil price moved up to Rs. 68.32 in January 1960 and steadily rose to Rs. 94.24 in December.

Copra and Coconut Oil—Prices of both copra and coconut oil registered a fall till April 1960 and thereafter a rising tendency was witnessed. Copra, which was quoted in January 1960 at Rs. 58.31 per md. at Alleppey (Kerala) and Rs. 61.39 per md. at Bombay, fell to Rs. 53.12 and Rs. 57.47 in March at Alleppey and Bombay respectively. Thereafter, prices showed an upward trend and copra stood at Rs. 67.50 at Alleppey and at Rs. 67.18 at Bombay in December. At Bombay, prices of coconut oil moved with copra prices. The price of coconut oil at Cochin was quoted at Rs. 80.49 per maund at the end of April 1960 and rose to Rs. 88.17 in July. After dropping to Rs. 85.72 in August an upward trend was noticed and the quotation stood at Rs. 97.42 at the end of December. At Bombay, the trend of coconut oil prices was downward till the end of May, when the price

stood at Rs. 88·16 per maund compared to Rs. 94·04 during January 1960. After fluctuating within narrow limits, the price rose to Rs. 95·50 during September and stood at Rs. 98·91 during December 1960.

Cotton—Prices of raw cotton have been subject to control ever since 1943, except for a short period in 1948. Every year, prices are reviewed in the light of the prevailing supply position of cotton and prices of competing crops. Floor and ceiling prices for raw cotton are fixed and announced before the beginning of each season. In addition to the prices for the basic variety, 'of' and 'on' allowances are also fixed to provide for differences in staple and grade. During the year under review floor and ceiling prices of the basic variety of raw cotton (Jarilla MGF 25/32") remained unchanged at Rs. 495 and Rs. 820 per candy respectively.

The year commenced with a firm tone. The price of cotton Jarilla MGF at Bombay advanced from Rs. 840 per candy, Rs. 20 higher than the ceiling price of Rs. 820 at the end of December 1959 to Rs. 845 per candy in January 1960. It rose further to Rs. 910 in March but declined to Rs. 890 per candy in April. Thereafter, Jarilla MGF rose to the highest level of Rs. 925 in June. In the following months, the price fell to Rs. 915 in July and to the ceiling level of Rs. 820 in December. To curb the rising trend of prices, a series of measures were taken by the Government. On the 4th December 1959 the Cotton Control Order was amended. According to the amendment, no manufacturer could purchase kapas unless he was the owner or lessee of a cotton ginning factory. With effect from January 1, 1960 the Textile Commissioner instituted compulsory quality survey and allocation of cotton quotas to textile mills. Liberal import quotas were also released. In addition to these measures, the Forward Markets Commission imposed special margins to control speculation in the futures markets. These measures did not have much effect in bringing down the prices which however, tended to fall towards the close of the year 1960 due to the large crop of the 1960-61 season.

Jute—During the year 1960, prices of raw jute generally witnessed an upward trend. The rise in raw jute prices was partly due to a considerable decline in production during 1959-60 and partly to an increase in overseas demand for jute goods. Speculative activities were also helped by long spell of drought during the sowing period of 1960-61 season. Certain measures to arrest the steep upward trend in prices were taken. Government allowed more import quotas for Pakistan jute. I.J.M.A. allowed its members to seal more looms in June, 1960. Restrictions were imposed on futures trading by the East India Jute and Hessians Exchange. Slabs of special margins were imposed and maximum prices for hedge contract fixed. All these measures had a salutary effect on the prices. At Calcutta, the price of Assam Bottom variety rose from Rs. 30·75 per maund in January to Rs. 50·00 in May but declined to Rs. 41·00 in June and to Rs. 35·50 in July 1960. But prices looked up as the season advanced and the Assam Bottom variety went up to Rs. 51·97 in October 1960 and stood at Rs. 53·00 in December due to lower arrivals and speculative activities. Prices of raw jute in mofussil markets moved on the pattern witnessed in the Calcutta market. Prices of jute goods also increased considerably during the year under review. At Calcutta, the price of hessian (40" × 10 ozs.) was quoted at Rs. 41 per 100 yards in January 1960, at Rs. 46·60 in June and Rs. 58·40 in December 1960. The price of sacking 'B' Twill at the same centre was Rs. 113·65 per 100 bags in January 1960, Rs. 131·75 in June and Rs. 185·00 in December.

Black Pepper—The price of black pepper at Alleppey recorded a sharp increase from Rs. 143·82 per maund in December 1959 to Rs. 198·90 in January 1960. During February

and March it fell to Rs. 186·00. During April the price rose to Rs. 225·00 and after declining during May to Rs. 201·30 rose again in June and stood at Rs. 228·75. Subsequently the price recorded a downward trend and stood at Rs. 131·15 per maund in December.

Rubber—Prices of rubber are fixed by Government from time to time in consultation with the Rubber Prices Advisory Committee, as laid down under Section 13(1) of the Rubber (Production and Marketing) Act, 1947. The cost structure is reviewed periodically. In September 1955, the price of Group I rubber was fixed at Rs. 155·75 per 100 lbs. (f.o.b. Cochin) with suitable differentials for other groups. The Tariff Commission, after examining the issue in 1960, recommended a lower price of Rs. 146 per 100 lbs. exclusive of sales tax and cess. The Government agreed to the cess being excluded from the statutory price, but contended that it would continue to form part of the statutory price for a short while pending the enforcement of the Rubber Amendment Act, 1960. Accordingly the price of Group I rubber was fixed at Rs. 149·50 per 100 lbs. (f.o.b. Cochin) exclusive of cess, with suitable differentials for other groups.

Wool—During 1960, prices of Joria white wool displayed an upward trend though in the latter half a downward trend was witnessed. The price of Joria white wool at Bombay rose from Rs. 251·70 per maund in December 1959 to Rs. 256·73 in January 1960. It fell to Rs. 251·79 in March. After another rise in April, the price gradually came down to Rs. 234·40 per maund in December 1960. The all-India index of wholesale prices for wool receded by about 4·0 per cent in the course of the year from 124 in January 1960 to 119·2 in December.

Turmeric—The price of turmeric at Calcutta recorded a sharp increase from Rs. 35 per maund at the end of December, 1959 to Rs. 40 in January 1960. During February to May the price ranged between Rs. 37 and Rs. 35. Thereafter there was a slight rise and the price rose to Rs. 40 in July. It steadily declined in the following months and stood at Rs. 35 in December.

Tea—Production of tea, according to the estimates of the Tea Board during 1960-61 aggregated 706·4 million lbs. as against 718·6 million lbs. in 1959-60. The price levels prevailing in the Calcutta tea market for the 1960 season's crop were most satisfactory and recorded a higher average than in 1959. The all-India index for wholesale prices of tea declined from 210·1 in December 1959 to 179·9 in March 1960. In the following two months, however, the index rose and stood at 194·4 in May. Again the index declined to 187·3 in June. From July 1960 onwards the index continued to rise and touched 217·9 in November. In December, however, the index again declined to 210·2. A similar trend was witnessed at individual centres. Thus, at Calcutta, the price of medium dust for internal consumption receded from Rs. 2·14 per lb. in December 1959 to Rs. 1·88 per lb. in March, 1960. Thereafter, after receding in May, the price rose steadily and stood at Rs. 2·15 per lb. in December 1960 as against Rs. 1·82 per lb. in May.

Coffee—According to the Coffee Board, the estimate for 1959-60 production of coffee in India was placed at 49,380 tonnes as against 46,595 tonnes in 1958-59, showing a rise of about 6 per cent. Prices of coffee generally showed an easier trend during 1960. Starting with a firm tone in January 1960 it continued to rise till the end of March 1960. The price of Native Flats coffee at Coimbatore rose from Rs. 170 per cwt. in January 1960 to Rs. 187 in March. With the arrivals of the new crop, it, however, declined to Rs. 136·36 in April. Thereafter, the price receded further and touched the lowest level of Rs. 126·36 in September. In the following two months, the price again rose to Rs. 128·58 in November.

but closed at Rs. 127.50 in December. The all-India index number for wholesale prices of coffee which stood at 87.0 in December 1959 rose to 90.4 in February 1960. Thereafter it started falling and reached the level of 81.5 in July. In subsequent months, the index again rose and stood at 86.4 in December 1960.

Chillies—The output of chillies increased from 328 thousand tons in 1958-59 to 353 thousand tons in 1959-60. The year 1960 opened with the price of chillies at Rs. 90 per maund at Patna (Bihar). The price recorded a significant fall to Rs. 70 in February. Subsequently, there was a steady rise in the price which moved up to Rs. 95 by the end of June. Thereafter, it showed a general downward trend and fell by about Rs. 12 to 13 per maund in the next few months. The price further declined sharply and was quoted at Rs. 65 per maund at the end of the year. The all-India index of wholesale prices of chillies also receded from 227.2 in January 1960 to 175.8 in December, 1960.

Tobacco—The production of tobacco during 1959-60 was estimated at 287 thousand tons compared to 312 thousand tons during 1958-59. The all-India index for wholesale prices of tobacco (raw) (Base: 1952-53=100) which stood at 100.2 in the beginning of the year rose to 110.9 in July 1960. In the next few months it fell. Subsequently, there was a steady rise in the index which moved up to 120.3 in November. Thereafter it declined to 114.1 by the end of the year. The price of Motihari (Medium) variety at Calcutta witnessed wide fluctuations varying between Rs. 141.16 per maund in February and Rs. 196.16 in October. Over the year under review it rose from Rs. 151.16 per maund in January 1960 to Rs. 166.16 in December, 1960.

Betelnuts—During the first half of 1960, price of betelnuts showed a steady rise. In August the price began to fall. The price of Malabar variety at Mangalore which stood at 136 per maund in January 1960 rose steadily to Rs. 180 in August. Thereafter, it took a downward turn and fell to Rs. 134.37 in October. Subsequently it increased to Rs. 145.56 in November but declined to Rs. 138.10 per maund in December, 1960.

Shellac—The year under review opened with the T.N. Shellac price at Rs. 75 per maund in Calcutta which advanced to Rs. 76 in March in response to good overseas demand. A marked fall was, however, witnessed in the subsequent month when the price fell to Rs. 70 per maund. The sharp decline caused concern among the upcountry manufacturers who decided to look out their factories. This step, coupled with improved overseas demand, especially from U.S.A., contributed to a rise in shellac prices which were quoted at Rs. 75 per maund in May 1960. This improvement was, however, short-lived and prices started declining and recorded a significant fall to Rs. 61 per maund in October 1960. But as the Siamese crop and the Indian Katki crop were poor, prices again started rising in November. The rise was accelerated by good overseas demand and the year ended with prices of T.N. Shellac at Rs. 688 per maund in Calcutta.

CONCLUSION

To sum up, the year 1960 exhibited a generally upward trend in prices of agricultural commodities. The main economic factor attributable to the rise in prices was the lower agricultural production in 1959-60. While prices of food articles remained relatively stable due to internal procurement and substantial imports during the year, a significant increase in prices was recorded in the case of raw materials due to shortfall in the output which in turn was reflected also in respect of manufactured goods. The output

of cotton in 1959-60 declined and prices of cotton firmed up in the year though receded towards the close. The production of jute was also lower and the prices of both raw jute and jute goods looked up as the season advanced. The production of the five major oilseeds during 1959-60 registered a substantial fall. Prices of oilseeds and oils reached high levels, except for a slight fall with arrivals of the new crop. The general rise in the price level was also due to improved standard of living, rising industrial activity and the expanding outlay incurred under the planned economy. The Government took several steps to check prices from moving up to unreasonable levels.

*Except for Andhra Pradesh and Madras States, data up to 1955-56 relate to the old set up of States and for 1956-57 to reorganised set up, unless otherwise stated.

(a) Data relate to Andhra region only upto 1956-57.

(b) Relates to Telangana region.

(c) Data for 1956-57 relate to Mahakoshal region only.

(d) Paddy prices.

(e) Cotton lint.

N.B.—(i) State averages for Andhra Pradesh, Bombay, Madhya Pradesh, Mysore, Punjab, U.P., West Bengal, Jammu & Kashmir, Himachal Pradesh and Tripura are weighted averages, while those for Bihar Orissa and Rajasthan are median averages during 1956-57.

(ii) State averages for Assam, Madras, Kerala, Delhi are, however, simple arithmetic averages during 1956-57.

APPENDIX III

Schedule of Export Tariff Values for 1960-61 & 1961-62

Serial No. in the schedule to the Act	Name of Articles	Unit	Tariff value 1960-61	Tariff value proposed for 1961-62
(1)	(2)	(3)	(4)	(5)
			Rs.	Rs.
1.	Bones—			
	Bones, broken or crushed (including bone grist but excluding bonemeal or bone manure)	Quintal	31.49	34.00
2.	Bristles—			
	(a) White:			
	Shorts & Riflings	Kilogram	8.27	9.00
	2" to 2½"	"	26.46	35.00
	3" to 3½"	"	75.51	95.00
	4" to 5"	"	113.54	120.00
	5½" and up	"	148.28	160.00
	(b) Dark:			
	Shorts & Riflings	"	4.41	6.00
	2" to 2½"	"	20.06	25.00
	3" to 3½"	"	48.50	55.00
	4" to 5"	"	100.86	125.00
	5½" and up	"	135.58	165.00
3.	Butter	"	6.06	6.00
4.	Cereals, other than rice and wheat—			
	Bajra	Quintal	23.62	23.62
	Jowar	"	18.70	18.70
	Barley	"	18.70	18.70
	Maize	"	23.62	23.62
6.	Fibres—			
	For Brushes:			
	(i) Palmyra Fibres	"	88.58	90.00
	(ii) Palmyra Stalks	"	49.21	50.00
	(iii) Other kinds	"	102.36	102.00
7.	Fish (excluding canned fish)—			
	(i) Fish, dry salted	"	137.79	138.00
	(ii) Prawns dry (excluding prawns powder)	"	314.95	340.00
	(iii) Shark fins and Fishmaws	"	472.42	472.00

APPENDIX III—cont'd.

Schedule of Export Tariff Values for 1960-61 & 1961-62

(1)	(2)	(3)	(4)	(5)
			Rs.	Rs.
8. Fruits—				
Almonds in the shell	Quintal		393.68	393.00
Almonds without shell	"		787.37	787.00
Cashew kernels	"		433.05	440.00
Coconuts	Thousand		200.00	200.00
Raisins, all kinds	Quintal		226.37	226.00
Tamarind	"		88.58	88.00
Walnut in the shell	"		177.16	180.00
Walnut kernel	"		492.10	450.00
9. Ghee	"		562.64	565.00
Ghee substitute including vegetable ghee and hydro- genated edible oil and fat mixtures	"		206.68	225.00
